### SARS CoV2 ANTIGENO

COVID-19 ANTIGENO

RESULTADO

**NEGATIVO**

#### INFORMACION DEL REACTIVO

DISTRIBUIDOR: LUMIRA S.A.S

INVIMA: 2021RD-0006568

LOTE: COVG21050035

FECHA DE VENCIMIENTO: 09.05.2023

SENSIBILIDAD DE LA PRUEBA: 95.0%

ESPECIFICIDAD DE LA PRUEBA: 99.2%

Tecnica: Screening Inmunocromatografia

Inmunoensayo Cromatografico de flujo lateral

Nota Explicativa: El examen para la deteccion de Antigeno COVID-19 (SARS - Cov2)

es una prueba diagnostica alternativa que se puede usar en:

Personas con sintomas de menos de 11 dias de evolucion, con o sin factores de riesgo confirmado de Covid-19 de hace menos de 11 dias.

SARS CoV 2 [COVID 19] ANTIGEN

TYPE OF SAMPLE: NASOPHARYNGEAL SWAB

#### REAGENT INFORMATION

DISTRIBUTOR: PRODUCTS LUMIRA S.A.S

GOOD VIEW NUMBER: INVIMA 2021RD-0006568

LOT: COVG21050035

EXPIRATION DATE: 2023.05.09

TEST SENSITIVE: 95.0%

TEST SPECIFIVITY: 99.2%

If the high suspicion of coronavirus infection continues, persistence of symptoms or non-concordance with the symptoms, it must be confirmed with the PCR test in 48 to 72 hours, if no more than 14 days have elapsed since the date of onset of symptoms; perform mandatory isolation at home for 14 days while the result of the second test is obtained, in turn continue with the other non-pharmacological guidelines promoted by the national government, which include hand-washing, maintaining self-care routines, personal hygiene, sleep, food and respiratory label as well as cleaning and disinfection of higher contact surfaces.

The result of the test must be evaluated by a health professional to define the type of case, as established by the Ministry of Health, in the epidemiological context, evolution and clinical symptoms.
